

The Bose® 5.1 Surround Sound System* for the Audi A6/A6 Avant

* 5.1 surround sound requires Audi MMI Navigation plus (DVD). Other MMI variants generate surround sound through Centerpoint® signal processing using conventional stereo sources.

Each part of the Bose sound system has been carefully engineered to work with the others for better performance. Replacing the factory-installed headunit (i. e. radio-CD/navigation system) or any other sound system component can significantly reduce system performance.

13 high-performance speakers

- 1 One 8-cm neodymium mid-range speaker (centre fill) on the instrument panel.
- 2 Two 2.5-cm tweeters in the front doors.
- 3 Two 8-cm neodymium mid-range speakers in the front doors.
- 4 Two 13-cm Richbass® woofers mounted in the front doors, each in a 10-litre custom-engineered bass enclosure.
- 5 Two 2.5-cm tweeters in the rear doors.
- 6 Two 16.5-cm low-mid-range speakers in the rear doors.
- 7 Two 8-cm neodymium mid-range speakers in the rear parcel shelf. (A6).*

System electronics

- 8 Digital amplifier mounted in the left side panel of the trunk with Bose digital signal processing and 8 channels of customised equalisation; AudioPilot® noise compensation technology; surround sound: Centerpoint® and SurroundStage® signal processing circuitry (all MMI variants), digital 5.1 decoding (only with MMI Navigation plus).
- 9 AudioPilot® microphone in the ceiling-mounted control panel monitors interior noise level.

* In the Audi A6 Avant the neodymium mid-range speakers are mounted in the D-pillars.
